TITUSVILLE AMATEUR RADIO CLUB

President: Tom Downs N4KFP 268-2707
Vice Pres: Dave Roberts N4KHU 383-9217
Secretary: Dawn Jacobs KB4BNL 267-1896
Treasurer: Lloyd Mullins KA4LTK 267-6342
DUES: $20/year with repeater privilege, $3/year without. Half year rate for part time residents using repeater is $10.
Repeater frequency: 146.91 MHZ.
MEETINGS: Fourth Tuesday each month at 7:00 PM Jaycees Building 409 Singleton Ave. NET: Thursdays 7:00 PM 146.91 MHZ

INCORPORATION VOLUNTEERS FOUND!

Wayne Sarosi, KB4YLY, and Ron Swank, KB4DCZ, have volunteered to lead the effort to incorporate the club. Wayne and Ron are going to research the requirements for incorporation and fill out the forms needed for filing. They intend to complete the task by December and will give a progress report at the August meeting on the 25th. Hats off to these brave men who didn't take one step backward when the volunteers were counted!

CIVIL DEFENSE ENDORSEMENT LETTER

A letter of endorsement from the Civil Defense director can be obtained by any Amateur requiring proof of public service to resolve difficulties in new antenna placements. Many amateurs have been able to place antennas on condominium roofs in their buildings this way. Contact KH6GH, Art Zippler, at 636-1805 for details.

CONTROLLER UPGRADE STUDIED

Replacement controllers are being looked at by the technical comittee. We hope to eliminate our reliance on outside support when the new unit is selected.

NEW MEMBERS

The club is pleased to have the following hams added to our roll and would hope everyone will do their best to make them welcome:

N4QLQ JONATHAN LITTELL
WA2IDZ RICHMAN MANHERTZ
WA4HQK M.O. BELSON

Congrats to Jeremy, KB4PRN on his upgrade to TECHNICIAN.

W4LEW BUILDS 2 METER MONITOR CUBE

John Walters, W4LEW has built a two meter reciver by conversion of an inexpensive Radio Shack weather cube featured in the June 87 QST. John says it was easy, and indeed the new cube worked very well at the meeting on July 28th. Parts kits can be had for $5.95 + shipping from Cornell University Amateur Radio Club. Look in the back page of the newsletter for details on available parts for this project.

LIGHTNING STRIKES TWICE AT SITE!

History was made last week when the repeater was struck once on the 28th and again on the 30th, taking out the *23 controller chip, reciever RF transistor, PA RF transistor, the dc reverse protection diode, and 555 ID chip. The antenna acted up also, and had to be repaired. Partial repairs should have the repeater back on the air before you recieve this letter.

CLUB STATISTICS

Current membership is 79 Amateurs.

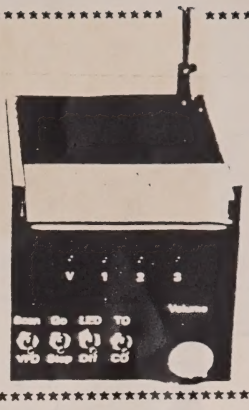
THE W2CXM 2-METER CUBE RECEIVER AND SCANNER

AS FEATURED IN JUNE, 1987 QST MAGAZINE

Parts kits available **exclusively** from:

The Cornell University Amateur Radio Club
401 Barton Hall
Ithaca, NY 14853

Price List - May, 1987



1. **Parts kit and instructions for Modifications I and II - (frequency retuning and squelch operation).** — **$5.95 + $2.00 shipping**

   This kit contains all the parts needed to convert a Radio Shack model 12-181B Weatheradio to a 2-meter cube receiver with squelch. Includes the squelch circuit board.

2. **Squelch circuit board only - etched and drilled.** — **$3.95 + $1.00 shipping**

3. **Parts kit and instructions for Modification III - (4-channel scanning).** — **$19.95 + $2.00 shipping**

   This kit adds 4-channel scanning capability to a 2-meter cube receiver already modified with frequency retuning and squelch operation. Includes all the parts needed and the scan circuit board.

4. **Scan circuit board only - etched and drilled.** — **$12.95 + $1.00 shipping**

5. **SPECIAL COMBINATION - Both parts kits described above -** — **$23.90 + $3.00 shipping**

   Includes both circuit boards. Save $3.00 over the individual prices.
